

SCHILLE

## Company Profile

Schille Informationssysteme GmbH is one of the leading companies for manufacturer-independent facility management, security control technology and industrial process-visualisation. The company understands itself as a software manufacturer and advisor for its software solution, PVis Enterprise Security. Distribution, achievement and following customer care will be arranged exclusively by system integrator and partner companies.

The satisfaction and confidence of well-known reference clients was the foundation of an exemplary success story over the last view years. The permanent development of PVis-systems and customer oriented configuration of new products are the center tasks of our company. In the past, Schille Informationssysteme often has been precursor in implementation of new technologies which has been observanced and intigrated by competition, afterwards.
